

**2022-23 JCAA
Medication Administration Policy/ Permission Slip**

On occasion during the school year a child will need either a prescription medication such as an antibiotic, or an over-the-counter medication, such as Tylenol. The administration or faculty will not give medication to a student unless a permission slip and the appropriate medication for one days dosage are turned in at the school office by the parent or guardian on the day the medication is to be administered. A student taking medication that has not been pre-approved or administered by a faculty or authorized staff member may be subject to possible discipline.

Jones Creek Adventist Academy has permission to give my child over-the-counter or prescription medication as directed on the label of the medication container, or per physician's written suggestion.

Jones Creek Adventist Academy cannot be held responsible for adverse or allergic reaction in any medication taken by a student while on school property.
