

Bee-lovers' Class 2025

1

Swarming and catching swarms Removing bees out of buildings

- ◉ Why do bees swarm? - **procreation**😊
- ◉ What cases swarming? -**crowdedness, propensity**
- ◉ What causes bees to abscond? – **stress, pests**
- ◉ What attracts bees into house walls? – **hollow protected spaces**

2

- What causes bees to abscond? – stress, pests

3

What attracts swarms?

Empty used beehives, frames,
lemon balm or lemon grass
fragrance

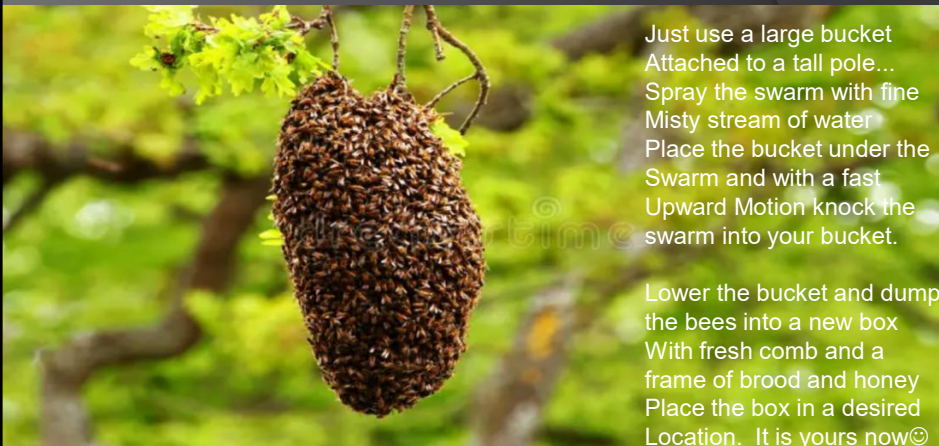

4

30 swarms moved in this year

5

What if swarm settles on a tree?

Just use a large bucket
Attached to a tall pole...
Spray the swarm with fine
Misty stream of water
Place the bucket under the
Swarm and with a fast
Upward Motion knock the
swarm into your bucket.

Lower the bucket and dump
the bees into a new box
With fresh comb and a
frame of brood and honey
Place the box in a desired
Location. It is yours now☺

6

Painters version of swarm tool☺

7

Bee Removal

Cutting the boards with
A cordless skillsaw

8

Removing the boards

9

Cutting the comb to frame size

10

Securing the comb into a frame

Thank Office
Depot for the
Rubber bands

11

Using bee-vac to collect bees

12

Catch the Q with a mini vac

13

Release the queen into your hive

14

Bee Vacuum

Made out of a bucket
Vacuum and two 5 gallon
Buckets. Too much suction
Kills bees, too little causes
them to clog the hose.
Experimenting will help to
Adjust suction just right ☺
Smooth inner-wall suction
Hose works best
